Professional Summary

Product Designer and UI/UX Designer with 4+ years of experience in UI/UX design, specializing in creating user-centric digital products for the agriculture sector and business center design. Proficient in wireframing, prototyping, and user research, with a strong background in collaboration with cross-functional teams.

Proficient in using tools like Figma, Adobe Creative Suite, PRD, Maze, User Research, Dbeaver, Jira, Notion, Trello, Whimsical, CSS, Html, and Mixpanel.

Passionate about aligning design with business objectives to deliver impactful solutions.

Academic Qualifications

2019 – 2021	INTERNATIONAL DESIGN SCHOOL , South Jakarta, Indonesia Major: Digital Design
2014 – 2018	MARANATHA CHRISTIAN UNIVERSITY , Bandung, Indonesia Major: Accounting (Bachelor of Economy)
2010 – 2013	SMA NEGERI 1 JAYAPURA , Jayapura (Papua), Indonesia

Experience

Freelance,
Jakarta – Indonesia

UI/UX Designer and Graphic Design,
August 2024 – Now

- Redesigned the user interface and streamlined end-to-end flows for an HRIS platform, improving usability and consistency across mobile and web.
- Designed the "Angkot Cargo" feature for a logistics client, enabling customers to ship parcels via public minivans that follow predefined routes, expanding delivery options and improving accessibility.

- Created a comprehensive ERP solution, integrating finance for journal entries, COA, and the result will be reports about Profit and Loss, Ledger, Financial Position (Balance Sheet), and Cash Flow (Indirect). Also included HRIS modules for streamlined operations.
- Delivered a new brand identity for a logistics company by creating the logo, business cards, letterhead, brand guidelines manual, and employee ID cards.

Linkz Asia,
Jakarta – Indonesia

UI/UX Designer,
June 2024 – August 2024

- Developed a Design System in Figma to serve as a component library for developers, ensuring adherence to Material Design guidelines.
- Collaborated with stakeholders and developers to create various projects, ensuring they are user-friendly and meet the needs of end-users.
- Developed the "Inventory" project, enabling users to manually input data directly into the Linkz application, which previously only allowed xls. file uploads.
- Implemented calculations and formulas in the "Order Form" for accurate tax and discount computation, allowing real-time visibility of the final amounts upon input.
- Conducted direct interviews with active users to gather feedback, holding online sessions where the application was demonstrated and user input was collected.
- Used Figma to create high-fidelity mockups, collaborating closely with cross-functional teams to brainstorm solutions and improve user experience.
- Developed a project that enables company owners to track their employees' activities during work hours.
- Created tickets and managed Jira as a tool for handing off tasks to developers, providing detailed explanations of the work to be done.

PasarMIKRO,
Jakarta – Indonesia

UI/UX Designer,
18 August 2021 – 23 August 2022

- Collaborated directly with developers and stakeholders to design and deliver projects, actively engaging in discussions about flow and design to ensure alignment.
- Conducted comprehensive desk research and field research, including site visits and direct conversations with users, to gather valid data. Listened to user feedback, identified pain points, and worked on solving their problems based on real-world experiences.

Projects:

Project 1: Area Tracking

The "Area Tracking" project addresses users' need to measure and record the size of their business area, including the type of business and commodities grown. The solution involves a "tracing steps" feature, where users walk or drive around their area to map it directly. This project allows users to get accurate measurements of their business land, which can also be used for traceability purposes when selling products. As a result, users who have not measured their business areas are now able to use this tool to manage their records effectively.

Project 2: Marketplace

The "Marketplace" project focuses on enhancing the B2B agricultural marketplace experience. Users prefer dealing with trusted partners but also seek new, reliable partners. This project provides each user with their own store to display commodities and a "success" indicator that shows transaction history. Users can save partner stores for quick access and use the marketplace directly or via WhatsApp, allowing transactions without app installation for new partners. The result is a more user-friendly marketplace that allows for flexible and secure transactions, improving user trust and satisfaction.

Project 3: Wallet 2 (Business Wallet)

The "Wallet 2" project solves users' challenges in managing sales and purchase funds in a single wallet by introducing a dedicated "Business Wallet" for storing sales proceeds. This separation allows users to clearly see their earnings and easily transfer or withdraw their funds. The implementation of this project resulted in increased user satisfaction as they could now manage their business finances more effectively without confusion.

Project 4: Financial Report (Cash Flow Record)

The "Financial Report" project was redesigned into a "Cash Flow Record" to offer users a clearer overview of their transaction history and financial activities on PasarMIKRO. The updated design uses bar charts for better visualization and allows users to manually input sales and other expenses. This change led to a significant increase in user engagement with the cash flow records, as users found the feature more intuitive and helpful for their financial tracking needs.

- Managed the entire design process from concept to delivery, including assisting in platform testing to ensure that the design was accurately implemented.
- Conducted user testing using moderated methods to obtain more reliable data and insights, refining the product based on these findings.
- Designed intuitive user flows and mockups in Figma, ensuring a user-friendly navigation experience.
- Used Figma to create high-fidelity mockups, collaborating closely with cross-functional teams to brainstorm solutions and improve user experience.
- Played a key role in branding and website development, maintaining consistency across platforms.
- Aligned design decisions with the company's business goals, contributing to the product's strategic direction.
- Managed Jira ticketing and provided detailed design specifications for seamless implementation.

Sinarmas Land,
Tangerang – Indonesia

Graphic Designer Intern,
February 2021 – May 2021

- Edited and shot videos for the e-learning section, collaborating with senior designers.
- Created posters and certificates for the e-learning section, and assisted in UI design for the website.
- Proposed a minimalist design approach for the website, ensuring a simple and effective user flow.

Community Experience

LitUp Indonesia,
Bandung – Indonesia
